

**Morning Report: Shovel Ready Buying**

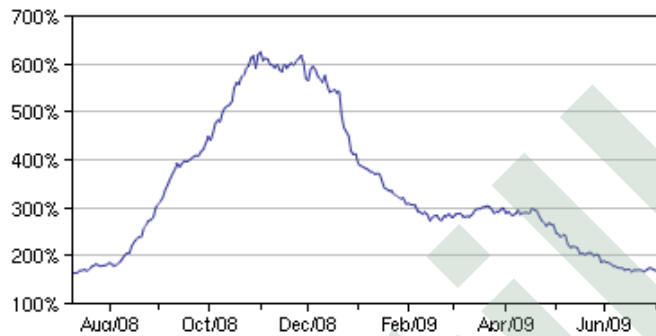

July 9, 2009

Canada's morning overview of insider filings with a special focus on companies that may interest active and momentum-oriented investors.

Canadian Company Insider Filing Tally\* - Yesterday

INK Market-Wide Sentiment Indicator\*

INK Market-Wide Sentiment Indicator: **174.7%**

Indicator Level: **Strong**

\*Filing Tally represents Toronto Stock Exchange and Venture companies with public-market transaction SEDI filings of directly-owned equity securities. Indicators represent companies with buy-only transactions divided by companies with sell-only transactions of direct ownership equity securities in the public-market by officers and directors (exclusive of officers and directors of subsidiaries or insiders) filed over the last 60 days. The chart line shows insider sentiment trends by connecting the historic indicator daily readings going back one year. Indicator levels register "Weak" when less than 70%, "Neutral" when between 70% and 90%, and "Strong" when over 90%.

**NEW:** Marker Trading Reports on page 5.

Please see "About Marker Trading Reports" on last page for more information.

- See the Market Report for more information on Canadian insider sentiment trends -

**Overview: Sentiment and Stocks**

With government stimulus money slowly working its way into projects, the demand for bulldozers, graders and other heavy equipment could eventually get a boost. Western Canada focused Rocky Mountain Dealers (RME) appears to be well positioned to cash-in through its sales network for both new and used construction and agricultural equipment.

The company has been expanding through acquisitions and this small cap stock currently offers a prospective dividend yield of about 4.5%. More importantly for us, we have seen two insiders pick up shares yesterday and we highlight the transactions below.

**Today's Chart**

**Rocky Mountain Dealerships Inc. (RME)**

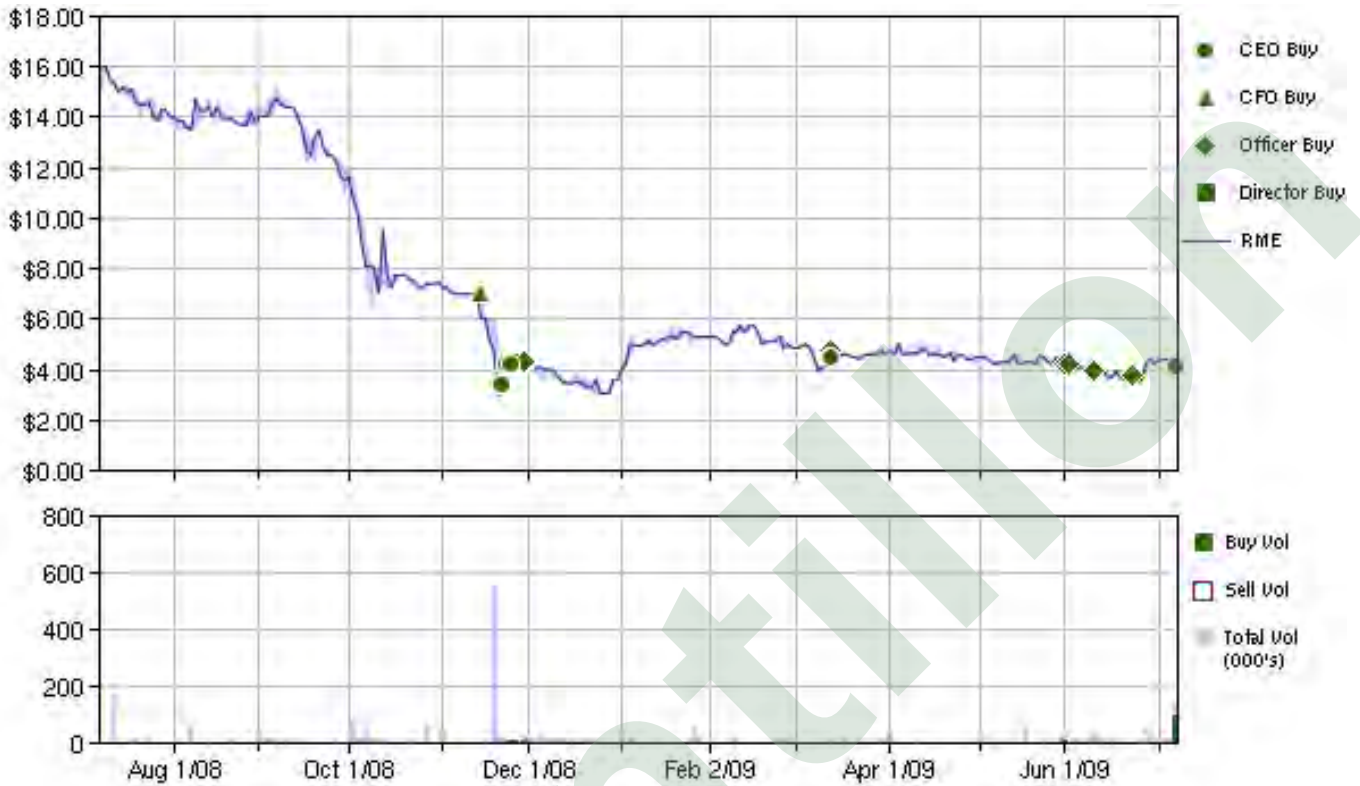

Chart reflects public-market and option-exercise transactions of common shares (unit trusts) by company officers and directors. USD transactions are converted to Canadian dollars by us using the Bank of Canada noon rate on the transaction date.

Yesterday, Rocky Mountain Dealers (RME) CEO Matt Campbell bought 50,000 shares at \$4.10 in the public market. Company president Derek Stimson also bought the same number of shares yesterday at the same price. This multiple buying by top brass at the firm is a positive sign.

Moreover, so far over the past year, RME executives have bought just over \$600,000 worth of company stock in the public market. The CEO was one of the major buyers, picking up just under \$250,000 worth of shares including yesterday's purchases.

Investors interested in this stock should note that Rocky Mountain shares can sometimes be a light trader with wide bid-ask spreads.

**Top-10 Tables: Yesterday's Activities**

Tables represent public-market transactions of equity securities plus purchases and sales of these securities from the exercise of options by company officers and directors filed on or after July 8, 2009. Transactions filed on Saturday and Sunday are aggregated into Friday's number. INK may adjust certain filings for common filing errors on a reasonable efforts basis.

M - Public market transaction

O - Exercise of options

<b>Top 10 Net "CO2" Buying</b> (By dollar amount, 000's)	
M CAE (CAE)	\$90.0

KDX	Klondex Mines

Venture Exchange	
Ticker	Company Name
BML	Barker Minerals
EAG	Eagle Hill Exploration
ECR	Ressources Cartier
PM	Prism Medical
RES	Rare Element Resources

**About Marker Trading Reports**

Marker Trading reports indicate if company officers, directors, and other insiders along with shareholders who own more than 10% of company shares have made a trade on either the TSX or TSX Venture Exchange during the previous trading day. This is based on preliminary information reported by the exchange which is collected from third parties. This data is subject to error. Once we are provided corrected information from the exchange, INK will make every reasonable effort to publish corrections to any Marker Trading report that contained inaccurate data by noting the details of the revision in the relevant INK Company Insider report. Corrections will only show up once so this report should be monitored daily if using the Marker Trading data.

The details of who bought and at what price will be reported by INK in its Latest Filing section of the Company Insider report after an insider filing is made with regulators for the Marker Trading transaction. This may involve a delay of a number of days. In addition, some trades that show up as Marker Trading may be exempt from insider reporting requirements and in these cases details will not be reported by INK. Some of the common exemptions granted from insider reporting requirements are certain purchases made in automatic employee purchase plans granted under National Instrument 55-101 or transactions made by eligible investment funds that rely on National Instrument 62-103 (Part 4). Links to these documents can be found on INK Research's website under the FAQ section, question 1 ([www.inkresearch.ca/faq.php#1](http://www.inkresearch.ca/faq.php#1)).

The term "marker" is used because brokers put a special "flag" beside any buy or sell order executed by insiders or significant holders on either the TSX or TSX Venture Exchange. The information covers trades in any exchange-listed security such as common shares, preferred shares, rights and warrants. However, at the present time, Marker Trading reports are not available for insider trades made on alternative Canadian exchanges such as Alpha Trading Systems or on US and other foreign stock markets.
